Presentation reviewed

Scenarios -
ANNUK.pptx

AP COP report

Andrea has sent this for presentation at the Exec meeting on 3rd April

Briefing paper for
Executive committee

COP lead meeting also on 3rd All leads attending

National guidelines

Vision to create one document of standards/ competencies which is generic for the whole country but can be tailored to the role required due to the diverse nature of renal AP.

6.3.25advanced
practice renal specif

Discussion that due to the length of the document people should be given until may to read and alter as required. Whilst much of this was generic it is likely to need changed such as the cross referencing to the updated framework coming about in the next couple of months and also the change of NHS England

There was a discussion around experience – does a person have to have 2 years specific renal experience before becoming a trainee ACP in Renal – consensus was no but should have +5 years' experience post qualification

It was highlighted about the importance of having the MDT input in this document and to read it to see if it would work for you and your unit. The example of Plasma exchange was brought up to be a Renal ACP you should be aware of what it is and the indications and how to facilitate this for a patient if required BUT being able to do a script for it or perform the task itself should not be a requirement (but may be added to an individuals job plan if their area feel it is required)

ALL – please read and review this is our one chance to get this right first time !

AOB – Lauren said about changing the meeting dates. Andrea will send a poll around

Action points

Andrea, Marie Rachel and Chris to attend conference

Leads to present summary at the Executive board meeting on Thursday

ALL – please read and review the standards document for next meeting

Andrea will send a poll around

Chris to send around a invite to join the AP COP on the Renal AP Whats app group

Next meeting (any days /times to avoid)

WC 5th May – Poll to be sent around
